Just in from an Australian client.

"Just a quick note to let you know how things are going. We have just been recruiting for retail and instructor positions using some of your techniques, and even though we haven't put all the information into practice, the results have been outstanding. As you are aware without a system the process is stressful and emotionally draining; not to mention making those costly mistakes. This time it's been exciting, enlightening and (dare I say it?) fun."
